MUHAMMAD ARSYI SULTHONI A

SOFTWARE ENGINEER • DATA ANALYST • TECHNICAL WRITER

Jakarta Selatan, Indonesia • sulthoniars@gmail.com • (+62) 851-5525-6233 • Portfolio: bit.ly/portofoliomarsyi

PROFESSIONAL SUMMARY

Computer Science graduate from Binus University with proven hands-on experience spanning software engineering, financial data reconciliation, and enterprise technical documentation. Adept at developing web platform modules (Aquera.id), orchestrating reliable data validation pipelines for fintech systems (Finday.ai), and delivering high-stakes government technical specifications (RDTR Interaktif, WIPO DJKI). Highly Skilled in SQL, Python, AI Agent, and Web/App Development with AI.

WORK EXPERIENCE

Junior Engineer — PT Orion Mattawang Ventures — 04/2026 – Present | Jakarta, Indonesia

- Built an autonomous WhatsApp operations agent using **Hermes Agent** and LLMs, integrating **Aquera's REST APIs** to automate shrimp aquaculture management, cycle tracking, and data logging directly from chat.
- Implemented a multi-tenant, **RBAC-secured** architecture on **AWS EC2** with edge-cached dynamic identity resolution for secure farm-level data access.
- Developed and optimized core web features for the **Aquera.id** application.
- Implemented and maintained responsive web functionalities utilizing modern web development practices to ensure high application uptime, code quality, and UX reliability.
- Audited, verified, and reconciled high-volume operational and financial cycle records prior to secure transmission into the **Finday.ai** financial platform.
- Collaborated cross-functionally with product and operations teams to automate data reconciliation, reducing manual verification errors and expediting financial reporting cycles.

Technical Writer — PT Surya Cipta Agung — 02/2024 – 02/2025 | Jakarta, Indonesia

- Authored comprehensive technical documentation, system architectures, and end-user guides for high-stakes national government platforms, including **RDTR Interaktif** and **WIPO DJKI**.
- Engaged closely with cross-agency government stakeholders, translating complex functional and regulatory requirements into precise technical specifications adhering to international standards.
- Established standardized documentation templates and versioning protocols that boosted knowledge transfer efficiency and accelerated system adoption among non-technical operators.

IT Architect Intern — Esri Indonesia — 02/2021 – 02/2022 | Jakarta, Indonesia

- Spearheaded the development of a mobile GIS application powered by Esri geospatial technology to promote the **UNESCO Geopark** at Pelabuhan Ciletuh.
- Engineered interactive geospatial features, geo-tagging, and multimedia conservation content, driving eco-tourism awareness and community engagement for regional heritage preservation.
- Collaborated within a cross-functional Agile team to align technical architectural designs with user-centric UX and environmental conservation objectives.

EDUCATION

Bachelor of Computer Science (S.Kom) — 2018 – 2022
Binus University
Focus: Information & Communication Technology • Jakarta, Indonesia

CERTIFICATIONS & BOOTCAMPS

Data Analysis Intensive Bootcamp & Mastery • MySkill (2025)
Data Analyst Training • Perpustakaan Nasional RI (2025)
Fullstack .NET Developer Bootcamp • Kodehive (2023)
Data Science Programming Fundamentals • SkillAcademy (2020)

SKILLS & COMPETENCIES

Programming & Web: Python, SQL, .NET / C#, JavaScript, HTML5/CSS3, RESTful APIs, Git
Data Analytics & BI: Power BI, Looker Studio, Microsoft Excel (Pivot, VLOOKUP, Modeling), Data Validation & Reconciliation
Domain & Platforms: Esri ArcGIS / Mobile GIS, Aquera.id, Finday.ai, Technical Writing, Enterprise Documentation (RDTR, WIPO)
Languages: Indonesian (Native), English (Professional Working Proficiency — CEFR C1 Reading / B2 Writing & Listening)
